Inventors were asked to see what they could find under the cool damp sand. They eagerly squished their fingers through ... searching as quick as they could.</p> <p>As each found a shape, they gasped "A STAR !!!" "what colour is it?" asked the educator, "RED" and so we continued, each inventor finding a new shape, shouting out the colour and the shape. A PURPLE SQUARE, A GREEN TRIANGLE. Hexagon was a little tricky, the shape not easily identifiable to our age group. As all the shapes had been found, educator began to draw the shapes in the damp sand. A few inventors stayed behind to join in, but dispersed shortly after.</p> <p>Water play : today it was a hot day what a better way to cold down using a water activity?</p> <p>This time we want to incorporate the water play with a gross motor skills activity. So we put water inside the sleeping stones</p>	<p>4/2 Children develop a range of skills and processes such as problem solving, inquiry, experimentation, hypothesising, researching and investigating.</p> <p>2/4 Children become socially responsible and show respect for the environment.</p>	<p>Ext 29/11/2023 - Freezing random items / toys in a larger container for children to explore.
